As you can see in the quote there are 20 newer thin panel iMacs that have been upgraded to 16GB Ram and a 500GB SSD, this means the iMacs will run faster and better than just a normal iMac with a normal spinning hard drive and 8GB Ram.

I am also doing this to future proof the iMacs meaning you will not need to upgrade them in the near future.

The year will be from 2012 to 2015 depending on availability.

we will also give a 12 month warrantee on the iMacs
